Wolves, tree logs and tree regeneration

Combined effects of downed wood and wolves on the regeneration of palatable and less palatable tree species

The research presented in this thesis was carried out at the Conservation Ecology Group, Groningen Institute for Evolutionary Life Sciences (GELIFES), University of Groningen, The Netherlands and the Mammal Research Institute of the Polish Academy of Sciences, Poland.

This research is financed by the Ubbo Emmius Fund of the University of Groningen, the KNAW Ecology Fund and by the National Science Center of Poland (grant number 2015/17/B/NZ8/02403).

Wolves, tree logs and tree regeneration

**Combined effects of downed wood and wolves on the regeneration of
palatable and less palatable tree species**

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 7 februari 2020 om 16.15 uur

door

Hermine Annette Lisa van Ginkel

geboren op 17 december 1990
te Westerbork

*Het kon elk moment
en het gebeurde: bizons.
Of het zo hoorde;
vol ruige elegantie
zijn zij er en weer verdwenen.*
